Lindab Roof Safety System
Better safe than sorry

Safety in all weathers

Few places are as exposed as a roof. Yet it's an ordinary workplace for many professionals. Sheet metal workers, chimney sweeps and janitors clamber up onto roofs every day – in rain, snow and wind.

Lindab's roof safety system offers individual solutions and components that not only provide the best roof safety possible, but can also be used on any roof. You can choose from hot-dip galvanized steel or lacquered steel in a wide range of colours to match the overall design.

Lindab's roof safety system in a nutshell

- wide range of products
- can be used on any roof
- easy to assemble
- hot-dip galvanized or painted
- highest safety level
- developed for and certified according to the most stringent Scandinavian regulations

Different solutions for different purposes

Walkways

Lindab's walkway makes walking on the roof safe and stable. Swaged square holes give good grip. The rounded edges protect ropes laid around the walkway.

Roof ladders

The roof ladder makes it easy to get up on the roof quickly.

Snow fences

In many countries snow fences are compulsory to prevent accidents caused by snow sliding off the roof onto the pavement.

Chimney platforms

Our chimney platforms are designed to protect chimney sweeps without impeding their work.

Smart mounting

Lindab offers a wide range of easily mounted and smart consoles for various roof designs.

A full range of roof safety components

The range includes:

- walkways
- handrails
- ridges
- eaves guards
- snow fences
- ladders
- chimney platforms
- fastening devices
- anchorage points
